DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Uk Patent Publication GB 2010435 A (Edward).

Edwards teaches a multilayer hose comprising an inner layer surrounded by a first layer of reinforcement material, a second layer of reinforced material and an outer cover, wherein the reinforcement materials can be braided filamentary material, per claims 1 and 7. See abstract. In addition, Edwards teaches that the intermediate layer can be a rubber of the type contemplated by applicants. See page 2, lines 80-85. As to the moisture content, Edwards is silent as to this property, however, since he teaches rubbers of the type contemplated by applicants, the examiner has reason to believe that this property would be the same. Therefore, the teachings of Edwards would have rendered obvious the invention as claimed in present claims 1-9.

Allowable Subject Matter
